

SBU 2R

COMPLETE SOUNDBAR WITH 4K CAM AND WIRELESS MICROPHONES FOR VIDEO CONFERENCES, ONLINE PRESENTATIONS AND LESSONS

Powerful
120 WATTS

Plug and play Connect it via USB C and it works on all major devices

2 professional UHF radio microphones included to amplify the voice

SBU 2R

QUALITY VIDEOCALLS

The built-in 4K webcam with 100° viewing angle ensures multiple people can video call with clean and crisp image quality.

It works with all major VoIP software such as Skype, Zoom, Google Meet, etc.

SBU 2R

USB PLUG AND PLAY

A simple and unique USB C connection allows you to connect SBU 2R to any device equipped with a USB port (PC, laptop, etc).

With the INCLUDED 5 meter USB C cable you can place the SBU 2R wherever you like.

No drivers are required for operation.

INCREDIBLY POWERFUL

The total power is 120W. The new 4" internal speakers (unlike the classic 3") are designed in conjunction with the new tweeters and allow precise and deep reproduction.

The cleanliness of the sound will allow you to be heard clearly by everyone, even in large rooms and spaces.

SBU 2R

2 RADIO MICROPHONES INCLUDED

An ICE wireless microphone and a DESK desktop wireless microphone included:
a concentration of technology.

ICE RADIO MICROPHONE

The high-level radio microphone designed especially for speech.
The head isolates the main sound source and simultaneously
minimizes unwanted background noise.

DESK RADIO MICROPHONE

The desk radio microphone is ideal
for placing on a desk to speak in total freedom.

The wide-range omnidirectional head allows it
to be positioned even in the center of a desk
and amplify multiple people at the same time with very high quality.

A practical display allows you to adjust the volume and channels.
With the MUTE button you can temporarily silence your voice.

You can use it by AA batteries (not included) or by MINI USB power.

SBU 2R

EASY TO CONTROL

Thanks to the front controls all adjustments can be made comfortably. The volume, equalization of the soundbar and the volume of the wireless microphones will be very easy to adjust.

The system was designed to make the volume of the radio microphones completely INDEPENDENT from the room in which you speak to the remote listener.

It is therefore possible to adjust the MIC volume as desired (even to zero if the room is small): in any case, those connected remotely will listen perfectly and adjust the volume of the conversation from their computer.

ENERGY SAVING

SBU 2R automatically switches to STAND-BY mode after 20 minutes of inactivity.

As soon as you play a new audio signal the system automatically reactivates.

Product code TY.SBU2R | Model SBU 2R | EAN 8030692602093

SBU 2R

INTEGRATED UHF RECEIVER

The 2-channel receiver allows you to choose up to a total of 60 different frequencies (30 freqs for each microphone) so you can use up to 30 SBU 2R in nearby rooms and/or classrooms.

No disturbance or interference!

UNLIMITED POWER

If the room is too large you can connect additional amplified audio systems such as the EMPIRE WALL200 speakers (not included).

A convenient RCA output is present on the left side panel: the output volume is independent of the general volume of the soundbar.

Line out RCA
